[this game is good not going to lie. The Camo Weapon Pack for Killing Floor is an overpriced cosmetic DLC like the other overpriced cosmetic DLCs, but for what it's worth the skins at least do look nice, and they're for guns that are actually quite useful. They're not as noticeable as the golden skins, but if you're considering buying this you're almost certainly in it for yourself and your love for the original KF. \(Showoffs would be better served by playing Killing Floor 2.\) Buy this on sale if you're enough of a KF1 aficionado to even want it to begin with.. Boring game not worth your time and cash. No animation, gameplay there is no gameplay it's basically a waiting symulator.. dis game is 2 ez.](#)

[Nah seriously, this is a good and fast game. However, be prepared to suffer, my brain is hurting for the Nightmare Mode. Even if I don't win the cash prize, I'll finish the game, no matter what. I hate when a game is laughing at my face.. THIS IS THE BEST SHOOTER EWER MUST BE BOUGHT REELLLU BEST GAME EWER 10/10! Real value is 3 USD. Really negative opinion. This game should be in early access. Not a finished product. I couldn't even buy a building. Do yourself a favor and google Capitalism Lab, it's the real spiritual successor to Capitalism 2.](#)

[EDIT/UPDATE:](#)

[I will admit that I had not viewed the tutorial videos and have read other reviews that claim they're extremely helpful. I clicked on the first tutorial video \(Production Chain, I believe\) and it already looked different than what I start off with in the base game \(A blank map with cities but no company infrastructure\). Then I saw that I have to be told what to click on in order to progress in the tutorial, despite if I click on other buttons, nothing will come of it, which makes me wonder why not just have it be a video instead of a press this button to progress tutorial.](#)

[But this is what my actual problem with the game was. I bought the trade center and then saw that in order to begin selling things, I need to have warehouses to supply things in the store, I started to buy a warehouse and anywhere I would click to put it \(including the green highlight squares\) the building would not place. I had plenty of money to afford it but the building would not place. I tried turning it with the shift and mousewheel command \(I'm playing on a laptop without a mouse but can still "scroll" with the two finger mousepad\) but the building would just not place.](#)

[As for my comment about early access, I've really been spoiled by Capitalism Lab, that game does not have as much in depth fields and research as this game does but that game is much more easier in terms of click and go gameplay. There are no artificial walls of 'if you don't have X, you can't do Z'. If you want to build an army of warehouses and no retail or supply, you can. That's why I feel like this game is missing a lot of features. Only 5 AI opponents, only 5 cities, cannot create sub-companies, cannot hire managers to auto run your business. This game is kind of like buying the first release of a new Civilization game, nice core idea but missing extra features.. The AI don't make any progress in my games. I try it multiple times and the AI after it buy 2 sectors that's it.](#)

[Do not buy this game even Alpha or Early Access games have better AI from this.](#)

[To bad and i was having this game in my wish list from August.. Is a good game there some bug but what game have no bug not the 1st time I play a pony game, but is one of the good one I played, it not really scary for me. I thing it because saw a lot ghost in my school day & national service in singapore some thing the mirror, lock door opan and close went there no one there, a headless ghost and more, hell I have a nightmare as a two tail pink hear and glowing blue eye catgirl in a kimono and what ever I do, hold and touch i can feel it in real time, hell injury I got in the dream like a cute on my right hand went I wake up there a cut on my right hand, or I play and watch too much horror and movie, so many of the disturbing image in the game don't face me at](#)

A fun side scroll zombie game where you fight your way up a huge building with each floor becoming increasingly more difficult. Not really an action game tho, more of a survival puzzle memorization game, you have to know what monsters are on each floor so it has trial and error to it. Still a fun little game for the price tag.. Wildlife park 2: Horses is a Survival Horror standalone expansion to the base game 'Wildlife park 2'.

The objective of this game is to own and manage your very own horse stable and to avoid getting kicked in the nuts by the horses on a daily basis. This game add's a new chapter to the survival horror experience that puts Resident evil and Silent hill to shame.

It has graphic scenes such as giving you the option of ripping out the reproductive organs of any horse you click on and also allows you to watch as the various horses sodomize eachother.

Review update 2016: What makes Horses happy? Apperently not 4'x8' living conditions.. wtf is this\u2665\u2665\u2665\u2665\u2665. installed wrong drivers for me

NEC battery controller replaced by Microsoft Surface battery controller

Intel i7 7th gen replaced by Xeon E3 controller

dont instantly click install, or u gonna ♥♥♥♥ed up. It gave me 16 hours of entertainment. That should be worth the price of the game.

I think it could have been great rather than OK if it had multiplayer.

Graphics and stability were very good.. this is awsome but only if online worked. Neat game, but as usual hindered by EA's total BS. I thought this would be fun to download on my laptop, but it turns out EA keeps the launcher running in the tray even after you exit out of the game, so you can say goodbye to battery life. From the moment you start it up you are barraged with so many ads the game slows down. Despite having an i7, it took around 5 minutes for this 2009 game to load. Stay far away.. Guys just bought and istalled the datig lessomms. I am using the oculus rift and I have set it up everythng as per instruction. Oculus rift is working fine with other programms. However, with Dating Lessons I get the"Unknown error, code 10002". PLease advice, as I can not use your program so far.
